ABOUT US:

Since 1990, KCS has strived to bridge the gap between technology and the people and businesses in our community. We work closely with our clients to assess their individual needs to effectively assist them in planning, implementing, and maintaining their IT systems. We have built undeniable results through our highly trained management team & engineers that are assigned to each client. As a social enterprise with a strong focus on making technology more accessible to the community, we pride ourselves on supporting local community organizations that facilitate STEM & job programs for youth and adults.

Our Mission : Since we have been in business, we have had the same mission of creating an equitable platform for people and businesses alike of marginalized communities by utilizing the most fundamental industry of the 21st century.

Our Vision : We envision a world where everyone has the same opportunity to improve their lives with technology.

CORE VALUES:

Community : Our number one priority is ensuring our company is an asset to our community with our opportunities and services. We must make sure we are servicing our community in our services and how we treat our team members. Our growth only matters if lives are improving around us.

Connections : Information technology is all about connecting ideas, people, and data. We value all the connections that we make, by ensuring our solutions take care of people first and provide them with the tools they need to navigate the 21st century.

Convenience : Work smarter, not harder. We strive to make lives easier by utilizing efficient processes and better solutions. We want our clients and our team members to enjoy working with KCS due to our ability to be flexible and efficient.
